

Provincial Record Holders

The introduction of the CPC judging system allows performances in different competitions and different years to be compared. Thus the list below represents the highest scores obtained in qualifying, national, and international competitions – Sectionals, Junior Canadians, Canadians, Canada Games, and Junior Grand Prix events, as well as the SCNL Provincial Championships. Some skaters may have recorded higher scores in other invitational events but these are excluded from the list for now. CPC was first used in the Eastern Challenge and national level events in 2004-05, and at Sectionals in 2005-06. Please let us know of any errors or omissions.

From 2008 onwards changes in the CPC system for prejuvenile and juvenile meant that new records are established as older scores are not comparable.

Synchronized Skating

* combined result of two programmes, with first programme factored at 50% of second. Skate Canada revised categories and criteria for the 2009-10 season, making it impossible to compare records from earlier seasons. Therefore new records were established from 2009-10 onwards. In 2011 all categories other than beginner skated twice, thus new records were established.
